How to read these numbers

- Feed downloads are measured by OP3 on the canonical feed since Aug 1 and arrive with a one-day lag: the last day included is October 31, 2026. Pandora and the Spotify app do not pull from the feed.
- Feed: +95 downloads since the October 25 report; 62 of the rows dated this week come from one Chrome browser in England (the same automated pattern as previous weeks), 7 from Apple Podcasts in Washington, D.C.
- YouTube Analytics runs about two days behind: October rose from 93 to 124 views as late data arrived, and the last-7-days strip covers October 26 to 30. November has no Analytics data yet.
- YouTube: no new comments this week, none held for review or marked as spam.
- Spotify: not read this time. The login code email did not arrive, so the read was skipped.
- YouTube: Analytics views since launch, read today (568 on the public counters, which exclude Shorts-feed plays).
- Spotify: not read this time (needs a login to the creator dashboard).
