YouTube and Spotify months come from YouTube Analytics and the creator dashboard. Feed months are exact (OP3, one-day lag).

Most listened episodes

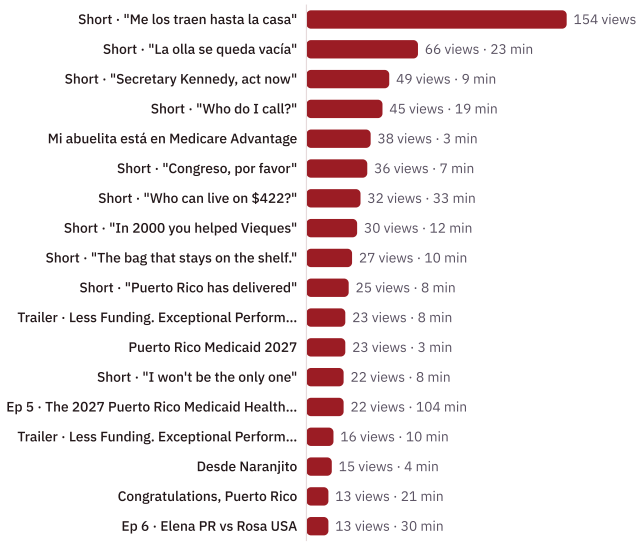

On the feed (Apple, iHeart, Amazon, web)

Downloads per episode since launch. PR and US counts after the bar.

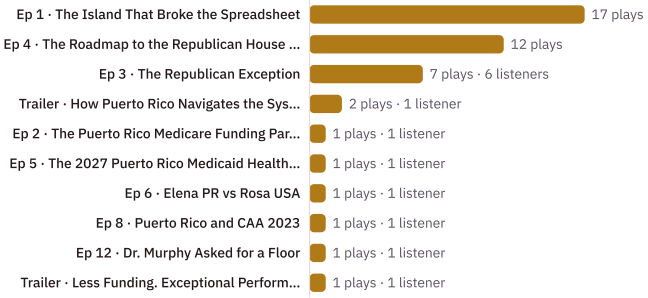

On YouTube

Views per video, YouTube Analytics since launch. Shorts dominate; full episodes add minutes, not views.

On Spotify

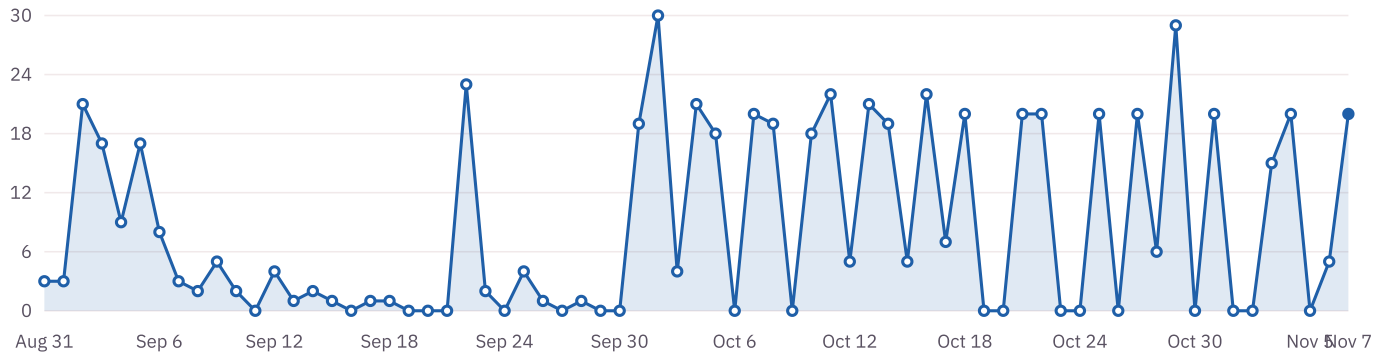

Plays per episode since publication, from the creator dashboard.

Download pace

Feed downloads per day

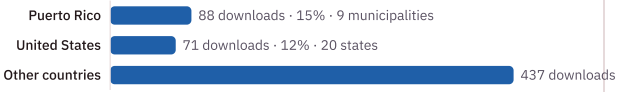

Every day since OP3 started counting. Last 7 days (Nov 1 to Nov 7): 60 downloads, the 7 days before: 95.

Where they listen from

Feed: downloads by country

596 downloads. The other countries (United Kingdom, Poland, China, Indonesia, Sweden, Germany, France, IN) are almost certainly bots and crawlers.

How to read these numbers

- Feed downloads are measured by OP3 on the canonical feed since Aug 1 and arrive with a one-day lag: the last day included is November 7, 2026. Pandora and the Spotify app do not pull from the feed.
- Feed: +60 downloads since the November 1 report; 55 of them come from one Chrome browser in England (the same automated pattern as previous weeks), 3 from Apple Podcasts in California.
- YouTube Analytics runs about two days behind; the last-7-days strip covers November 1 to 6.
- YouTube: no new comments this week, none held for review or marked as spam.
- Spotify: read today; all-time plays (44) and followers (4) are unchanged since October 25. Its audience page now reflects a single listener in the last 30 days, so its country and gender split is not meaningful this week.
- YouTube: Analytics views since launch, read today (573 on the public counters, which exclude Shorts-feed plays).
- Spotify: read today from the Spotify for Creators dashboard (all-time plays, followers, listeners in the last 30 days).
