How to read these numbers

- Feed downloads are measured by OP3 on the canonical feed since Aug 1 and arrive with a one-day lag: the last day included is October 10, 2026. Pandora and the Spotify app do not pull from the feed.
- Feed downloads jumped this week, but almost all of it is one source: 72 of the 75 downloads since the October 4 report came from Chrome on a single Windows computer in the United Kingdom, spread across every episode on four days. That pattern looks like one machine pulling the whole catalogue, not 72 listeners. Counting October, 126 of 149 downloads have that same signature. App listens this week: 2 (Apple Podcasts, United States).
- Episode 15 (Congratulations, Puerto Rico: For the CMS 2027 Star Ratings...) was published today, October 11, on the feed, Spotify and YouTube; it has no plays yet in these counts.
- YouTube Analytics runs about two days behind, so October 10 and 11 are not in the YouTube numbers yet. Week-over-week YouTube views compare against the October 4 report (1,135 to 1,156).
- No new comments or reviews this week on Spotify, YouTube or Apple Podcasts.
- YouTube: Analytics views since launch, read today (514 on the public counters, which exclude Shorts-feed plays).
- Spotify: read today from the Spotify for Creators dashboard (all-time plays, followers, listeners in the last 30 days).
