Downloads per episode since launch. PR and US counts after the bar.

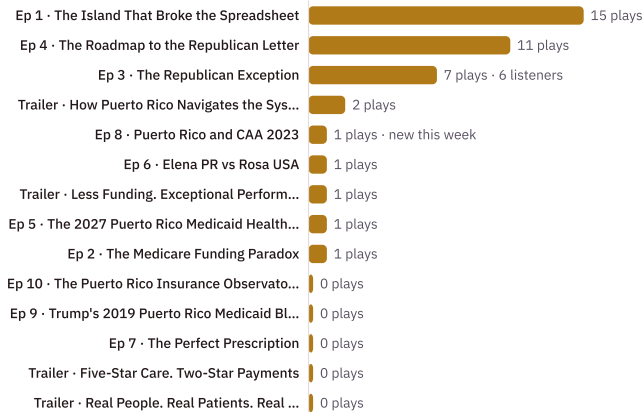

On YouTube

Public view counters read today. Shorts dominate; full episodes add minutes, not views.

On Spotify

How to read these numbers

- Feed downloads are measured by OP3 on the canonical feed since Aug 1 and arrive with a one-day lag: the last day included is September 18, 2026. Pandora and the Spotify app do not pull from the feed.
- YouTube Analytics (views including Shorts-feed plays, country split, traffic sources) was not available today: the API quota resets at 07:00 UTC.
- YouTube: public per-video counters read today. They exclude Shorts-feed plays, so YouTube Analytics reports more views.
- Spotify: read today from the Spotify for Creators dashboard (all-time plays, followers, listeners in the last 30 days).
