How to read these numbers

- Feed downloads are measured by OP3 on the canonical feed since Aug 1 and arrive with a one-day lag: the last day included is September 18, 2026. Pandora and the Spotify app do not pull from the feed.
- YouTube: 945 is the channel total in YouTube Analytics since launch, with plays processed through Sep 15 (Analytics runs 2 to 3 days behind). Only 451 of those views sit on the 24 videos currently on the channel: the rest were on Shorts later deleted and replaced with new versions (Yamilet, Doña Carmen, Dr. Ortiz, Jonathan) and on the VarMed nurse Short removed on Sep 17, and YouTube also revises per-video counts when it discards plays it classifies as invalid.
- YouTube by country covers 733 of the 945 views; YouTube does not attribute the rest to a country. The public counters (475) count only the current 24 videos and exclude Shorts-feed plays.
- Spotify: read today from the creator dashboard. 1 new play since Sep 17 (39 to 40), on episode 8; episodes 9 and 10 have none there yet.
- YouTube: Analytics views since launch, read today (475 on the public counters, which exclude Shorts-feed plays).
- Spotify: read today from the Spotify for Creators dashboard (all-time plays, followers, listeners in the last 30 days).
